

Graduate in International Trade, pos-graduate in human resources management and pos-graduate in Export Management e Entrepreneurial Development.

My professional guideline is relationship. I just like a lot dealing with people. Considering the interaction with other cultures then I am completely challenged. In my first international experience, I have noticed that. Being in some big, cosmopolitan cities in the UK has opened my eyes, then participating in an international postgraduate program with people from all corners of the world made me open my worldview even further and brought me a huge background.

Nowadays I improved a lot my negotiation skills, my capability of dealing with pressure and change. Working at international group is, in itself, a challenge. Furthermore, it gives lots of possibilities and opportunities for international relations. My goals are moving forward always focusing on networking, new challenges and results.

Specialties: Export sales, Commercial, Purchasing, negotiation, Brazilian import legislation, dealing with different cultures.
