

MYKHAILO (MICHAEL) RUSHKOVSKYI

Candidate – MIB Alumni Governing Council 2026-2029

Enterprise Risk Manager, Qatar Chemical Company (Q-Chem) | MBA 2010 | Doha, Qatar |  [LinkedIn](#)

15 years after completing my MBA in Trieste, my work has stayed close to one question: how do organizations and communities hold up under real pressure? I am standing for the MIB Alumni Governing Council to bring that experience, and a network spanning Ukraine, Central Europe and the Gulf to the Council table.

GOVERNANCE EXPERIENCE

I run the risk committees that report directly to the Board of Directors at Qatar Chemical Company (Q-Chem). Earlier, at Naftogaz of Ukraine, I built the company's Enterprise Risk Management function from the ground up and reported regularly to its Supervisory Board, including the country's first Risk Appetite Statement at a state-owned enterprise. Sitting on a governing body, setting its agenda, and turning expert input into board-level decisions is not new territory for me; it is what I do.

CRISIS-TESTED RESILIENCE

In 2022, while leading risk management at DTEK Group, I built the war-risk analytics and asset vulnerability mapping that earned the **European Risk Management Award** for Business Continuity Programme of the Year, developed while the underlying conflict was active, not simulated. I know what it takes to keep an organization, and a community, functioning when circumstances stop cooperating.

GEOGRAPHIC BRIDGE

Kyiv, Trieste, Prague, Doha – my network sits outside the Italy-centred core of most MIB Alumni activity. I would build a bridge to alumni across Central and Eastern Europe and the Gulf: two regions with growing MIB representation and, currently, no voice on the Council.

INITIATIVES I WOULD BRING TO THE COUNCIL

- **Frontier markets alumni network** – connecting MIB alumni working in geopolitically complex regions (CEE, Gulf, MENA).
- **Boardroom readiness mentoring track** – pairing senior alumni with those pursuing Board and Supervisory Board roles.
- **Business continuity framework for MIB Alumni Association (MAA) operations** – resilience planning for the Association's own events and services.

I am available for regular Council meetings (both offline and online) and would welcome the opportunity to contribute.
